Review on the educational and scientific training program for Doctor of Philosophy at the Institute of Macromolecular Chemistry of the National Academy of Sciences of Ukraine from the specialty "Chemistry"

The Institute of Macromolecular Chemistry (IMC) of the National Academy of Sciences of Ukraine (NASU) is a powerful scientific center in Ukraine, which has authoritative scientific schools for training specialists in the field of chemistry. One of the tasks of the functioning of such scientific schools is the training of their own personnel, capable of conducting original and completely independent projects in future research in the fields of Macromolecular Chemistry. The educational and scientific program for training doctors of philosophy of specialty "Chemistry" provides educational and scientific components, the mastery of which provides an opportunity for the applicant to acquire theoretical knowledge, skills, and other competencies sufficient for producing new ideas, solutions of complex problems in the field of chemistry, mastering the methodology of the scientific and pedagogical activity, as well as conducting own scientific research, the results of which have scientific novelty, theoretical and practical significance.

The goals of the educational and scientific program are consistent with the subject matter of IMC NASU. An important factor in the implementation of the IMC's program is the institution's cooperation with leading institutions universities and scientific institutions abroad. For example, scientists of IMC NASU together with colleagues from the University of Rouen Normandy (research lab GPM) participated in projects on the synthesis and thermal characterization of novel polymer systems and nanocomposites.

Summarizing what has been said, I note that the reviewed educational and scientific program of the Institute of Macromolecular Chemistry of the National Academy of Sciences of Ukraine provides a high level of training for those obtaining a scientific degree Doctor of Philosophy in Chemistry.
